Work Experience

Junior Backend Software Engineer

Media MKR • Mars 2023 - August 2023

- Actively engaged in the development of Django solutions while rigorously applying the Scrum methodology for effective project management and collaboration.

Software Engineer Intern (Graduation Project)

Aftercode • April 2021 - December 2022

- Developed and tested a Human Resources web application accessible to employees and human resources staff, capable of managing all the employee's private information, overtime, leaves, contracts, vacations, payrolls, and direct messaging.

Technologies Used: HTML/CSS, jQuery, Django, Celery, Microsoft SQL Server.

Web Developer Intern

TuniSolutions • June 2020 - August 2020

- Developed an inventory management web application, implementing features like inventory tracking, order management, and reporting. This internship enhanced my skills in building efficient and user-friendly inventory management solutions.

Technologies Used: .NET Framework, ASP.NET Web API, Entity Framework, Microsoft SQL Server.

Web Developer Intern

Universal Web Soft • May 2019 - June 2019

- Contributed to web application development, collaborating with experienced developers to implement features, troubleshoot issues, and improve functionality. I gained practical experience in HTML, CSS, and JavaScript.
